

Triple-S Optimo PSHB

2025 Enhanced Formulary

This formulary was updated on March 14, 2025. For more recent information or other questions, please contact us, Triple-S Optimo PSHB Customer Service at 833-201-9256 (TTY users should call 1-866-215-1999), Monday to Friday: 7:30am to 8:00pm (AST), Saturday 9:00am to 6:00pm (AST), Sunday 11:00am to 5:00pm (AST) or visit www.ssspr.com/postal.

When this Drug List (Formulary) refers to “we,” “us,” or “our,” it means Triple-S Optimo PSHB. When it refers to “plan” or “our plan,” it means Triple-S Optimo PSHB.

Introduction: Triple-S Optimo PSHB Enhanced Formulary is a useful reference for drug product selection. Triple-S Optimo PSHB Enhanced Formulary has been reviewed by the Triple-S Salud Pharmacy and Therapeutics Committee.

Triple-S Optimo PSHB Enhanced Formulary is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

Preface: The formulary is organized by sections, which refer to either a drug class or disease state. Unless exceptions are noted, all dosage forms and strengths of the drug cited are included in the formulary.

The Triple-S Salud Pharmacy and Therapeutics Committee may impose restrictions or not reimburse for specific drug products or types of products. For example, certain drugs and supplies for hair removal and hair growth are excluded from the pharmacy benefit. In addition, over-the-counter (OTC) products, with the exception of diabetes monitoring products, are generally not included in the pharmacy benefit.

The formulary is separated by Tiers in the following manner:

Tier 1	Generic Drug
Tier 2	Preferred Brand Drug
Tier 3	Non-Preferred Drug
Tier 4	Specialty Tier

All drugs that are preferred are noted in their respective tiers of the drug lists throughout this formulary. Drugs may be reviewed by the Pharmacy and Therapeutics Committee and designated non-preferred. The Pharmacy and Therapeutics Committee may designate certain drugs as non-preferred, typically if the cost-effectiveness is less than other similar drugs.

Restrictions to coverage: Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** Triple-S Optimo PSHB requires you or your prescriber to get prior authorization for certain drugs. This means that you will need to get approval from Triple-S Optimo PSHB before you fill your prescriptions. If you don't get approval, The plan may not cover the drug.
- **Quantity Limits:** For certain drugs, Triple-S Optimo PSHB limits the amount of the drug that the plan will cover.

Pharmacy And Medical Policy Committee: The role of the Triple-S Salud Pharmacy and Therapeutics Committee includes evaluating new medications and making recommendations for the designation of preferred or non-preferred status on Triple-S Optimo PSHB Enhanced Formulary. The Pharmacy and Therapeutics Committee is made up of physicians and pharmacists who are not employees or agents of, nor have financial interest in Triple-S Salud.

Product Selection Criteria: The Pharmacy and Therapeutics Committee will consider U.S. Food and Drug Administration (FDA) approved drugs for preferred status designation. The evaluation includes a literature review; expert opinion may also be sought. Formal reviews are prepared that typically address the following information:

- Safety
- Efficacy
- Comparison studies
- Drug interactions
- Approved indications
- Formulation and administration
- Adverse effects
- Contraindications
- Pharmacokinetics
- Patient compliance considerations

- Medical outcome and pharmacoeconomic studies

When a new drug is considered for preferred status, an attempt will be made to examine the drug relative to similar drugs currently preferred. In addition, entire therapeutic classes are periodically reviewed. The class review process may result in a designation of non-preferred status to drug(s) in a particular therapeutic class, in an effort to continually promote the most clinically useful and cost-effective agents.

Drugs evaluated by the Pharmacy and Therapeutics Committee and not classified as preferred receive a non-preferred designation on Triple-S Optimo PSHB Enhanced Formulary. This designation indicates the Pharmacy and Therapeutics Committee's belief that the drug offers no important clinical or cost advantage over comparable preferred drugs, or that there is currently insufficient information to determine its appropriate clinical role, or that questions remain regarding safety and effectiveness. Non-preferred drugs may be covered under Triple-S Optimo PSHB Enhanced Formulary. However, there may be additional costs incurred by the patient to receive a non-preferred medication. Physicians are encouraged to prescribe preferred drugs.

All the information in Triple-S Optimo PSHB Enhanced Formulary is provided as a reference for drug therapy selection. The final choice of a specific drug selection for an individual patient rests solely with the prescriber.

Generic Substitution: One way to reduce out-of-pocket cost is by requesting a generic drug.

What are Generic Drugs?

A generic drug has the same active ingredients in the same amounts as the brand-name drugs. They cost less and are approved by the FDA.

The generic medications from the following therapeutic categories have \$0 copay, if prescribed by participating providers:

- Generic antihypertensives: Angiotensin converting enzyme inhibitors (ACEIs), Angiotensin II receptor blockers (ARBs), Direct renin inhibitor;
- Generic Oral Antidiabetics (excludes injectables);
- Generic statins;
- Naloxone

Notice: The information contained in this Triple-S Optimo PSHB Enhanced Formulary, and any associated appendices is provided by Triple-S Optimo PSHB, solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. Triple-S Optimo PSHB Enhanced Formulary is not a complete list of all covered medications. This Formulary is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. Triple-S Salud assumes

no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

The information contained in this document is proprietary. The information may not be copied in whole or in part without the written permission of Triple-S Salud. All rights reserved.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with Triple-S Salud.

If viewing this formulary via Internet, please be advised that the formulary is updated periodically, and changes may appear prior to their effective date.

Triple-S Salud is an independent licensee of BlueCross BlueShield Association. Medicare prescription drug benefits under the Triple-S Optimo PSHB plan are sponsored by the BlueCross BlueShield Association under its Medicare contract S2135.

Legend: The information in the Requirements/Limits column tells you if Triple-S Optimo PSHB Enhanced Formulary has any special requirements for coverage of your drug.

You can find information on what the symbols and abbreviations on this table mean at the beginning of this table.

OTC	Over-The-Counter
PA	Prior Authorization (approval): you must have approval from the plan before you can get this drug
QL	Quantity Limit: there is a limit to how much of the medicine we will cover
